42	例題の図	 <p>The graph shows a downward-opening parabola on a Cartesian coordinate system. The x-axis is labeled with x and has tick marks at $-\frac{7}{4}$, 0, $\frac{1}{2}$, 1, and 4. The y-axis has tick marks at 2 and -7. The vertex of the parabola is at $(\frac{1}{2}, 2)$. A point on the curve is marked at $(4, -7)$. The label $\frac{7}{4}$ on the y-axis is a typo for $-\frac{7}{4}$.</p>	 <p>The graph is identical to the one in the '誤' column, but the label $\frac{7}{4}$ on the y-axis is corrected to $-\frac{7}{4}$.</p>
